Tyre Racking

H-Racks specialise in providing tyre racking and storage solutions for the automotive industry. For many years, our specialised and knowledgeable team have provided tyre racking installations for many of the UK's best-known tyre wholesalers, dealership groups and tyre depots.

Based in Hampshire and covering the UK, H-Racks offer on-site assistance, FREE consultation and CAD design that can help you maximise the tyre storage potential of your premises.

Supply only **SPEED** Tyre Racking Ranges

Typically, if all that is required is to store 30-100 tyres on site then this can be specified and costed over the phone or via email. Our fully priced tyre racking pdf gives all the detail required including the size of tyre racking bays available and the number of tyres each bay can

store. Delivery is very quick on this type of requirement, 3-5 days as standard.

As standard our tyre racking is supplied with 3 storage levels. With only 3 levels this allows for all of the tyres to be picked (or for the racks to be loaded) whilst standing at ground floor level. If you have more height available that you wish to utilise then we can also provide a tyre racking system with 4 or even 5 storage levels. We can also provide a set of access steps to ensure you use these upper levels safely.

You may have an area earmarked for the new tyre racking system and we can help you to make sure you utilise the right bay size or combination of bay sizes to make the most of your dedicated tyre storage area.

Please feel free to get in touch and we can discuss your needs and provide a quotation and a technical drawing prior to order.

SPEED Tyre Racking Price List (January 2025)

Part number	Height	Width	Tyres Stored	Beam levels	Price
1915S	1984mm	1534mm	12	2	£268.00

All prices include delivery to UK Mainland

Part Number Suffix:

"S" - Starter Bay
"E" - Extension Bay

Tyre Racking Projects

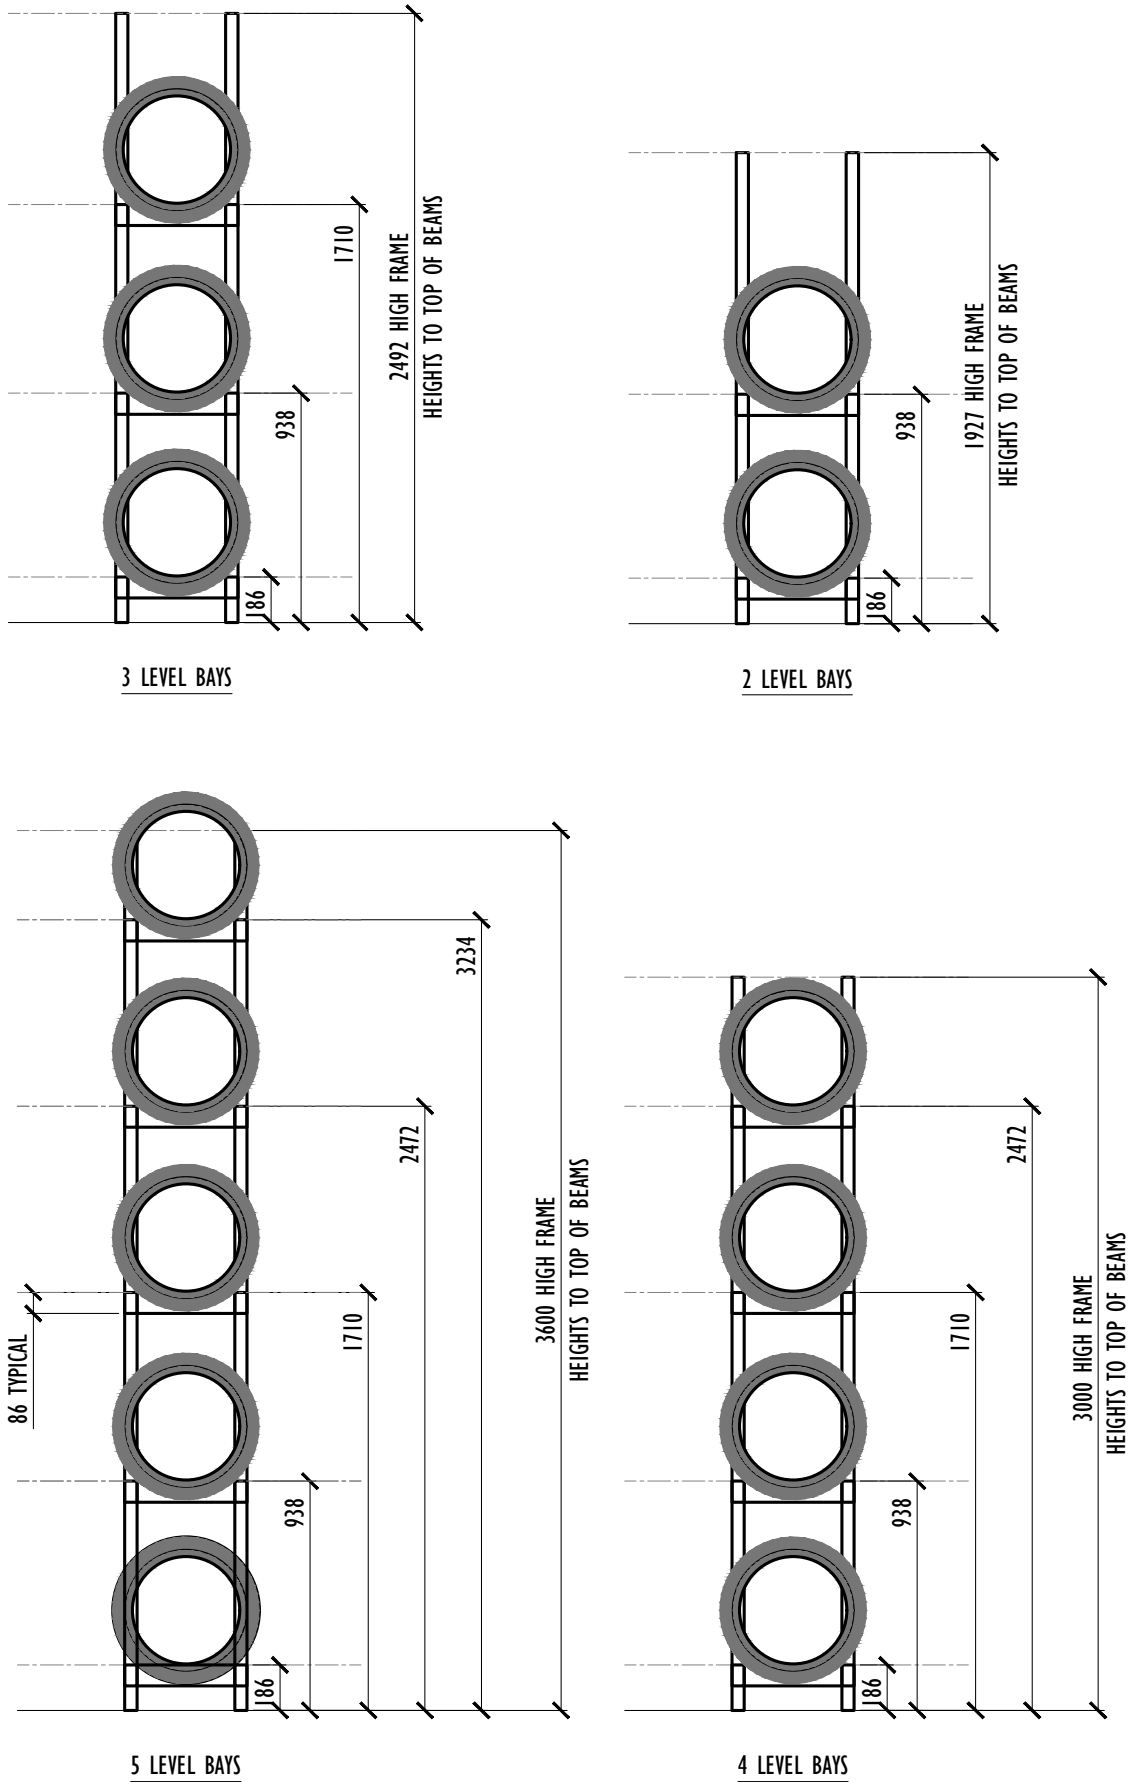

For larger requirements where businesses need to store several hundred, maybe even thousands of tyres, our on-site consultancy is recommended. Many large tyre depots, tyre wholesale or distribution centres may require tyre racking that extends up to 5 levels high or sometimes tyres are stored in stillages which are then stored in pallet racking. Using the available height of a building is key to maximising the storage potential of a facility and there are several ways to accomplish this:

- **High Bay Tyre Racking**
Access Steps provided to pick from upper levels.
- **Tyre Stillages in Pallet Racking**
Fork-Lift Truck required to move the stillages around the site, load/unload the racks.
- **Tyre Racking with a Mezzanine**
Unlock the headroom at your site with a H-Racks mezzanine floor.

We always provide this consultancy service, free of charge, at the earliest opportunity and across the UK. Following the survey, a full CAD design will be submitted with the quotation for your approval.

Tyre Racking Elevation

Shelf Trays - High Density Small Parts Storage

Our range of shelf trays are designed for strength and ease to use at a competitive price.

Our shelf trays feature a spring loaded shelf stop at the back of the tray. This means the tray can be withdrawn from the shelf and suspended offering around 90% clear picking.

- Improved strength and rigidity
- Ergonomic features
- Sprung loaded shelf stop
- Can be sub-divided
- High density storage system
- Offers fast retrieval times
- Goods are kept clean
- Better product identification
- Uprights are Blue RAL5010
- Shelves are White RAL9010

This stop also acts as a handle to make it easier to carry.

With shelf trays available in 3 depths, 2 widths and 2 heights any configuration can be designed to offer the maximum high density storage solution. Trays can be sub divided from left to right and all trays and dividers come with labels.

Louvre Racks

Our range of louvre racks provide an efficient way to organise small parts bins which include every size for our Rhino range.

The racks provide a simple way to organise small part storage bins, providing a high density storage solution whilst maintaining an efficient way to retrieve items from the picking face.

The frames are made from strong box section profiles finished in light grey RAL 7035 and the louvre panels from hard wearing galvanized steel.

Midispan - Industrial Galvanised Racking

Midispan is our longspan shelving system with steel decking panels supplied in a contemporary pre-galvanised finish.

This makes it ideal for the most demanding applications and environments. The profiles are designed in such a way to ensure there are no sharp edges when assembling or in use.

The system has a wide range of profiles and sizes which provides complete flexibility when designing your warehouse. Along with a range of accessories that make it simple to store many different products as well as bespoke solutions for the automotive industry.

- Heavy duty and secure
- Easy to build and reconfigure
- Beams adjust every 25mm
- Guaranteed delivery in 5 days
- Available in blue or galvanised uprights
- Galvanised beams and decking panels

Midispan 1950 x 1800 x 600 on M50 profile frame and C70 beams with galvanised decking +detail on metal feet

Price includes pair of beams and safety pins. Accessories not included.

Rivet Racking

Offers incredible value for money, whilst offering amazing strength and rigidity.

The system is simple to build with all parts being tapped together using a rubber mallet. All components are joined via the heavy duty rivet and key hole slot which offers a simple and effective way to assemble the racking.

There are no nuts and bolts and the bays require no bracing therefore offering uninterrupted access on all four sides. Bays are available in various heights up to 3660mm high.

With the average time to assemble a bay being just 5 minutes, you will be amazed at how easy it is to create large installations in no time at all. All bays are ready for immediate dispatch and will be delivered in 5 working days.

- **Best Selling system**
Offers the widest choice of sizes, all at great value
- **Easy to build and re-configure**
Simply tap together with a rubber mallet
- **Strong and sturdy**
With shelf capacities up to 600kgs,
- **No nuts, bolts or screws**
Simple and quick to erect, with no fuss
- **Strong epoxy paint finish**
Designed to give years of service and withstand

J Rivet

Our J rivet system has unbeatable strength at an incredible price. It is also manufactured to the highest quality.

The shallow J beam profile (only 30mm thick) gives increased storage capacity whilst maintaining excellent strength.

NDurance Workbenches

This heavy duty range of industrial workbenches are ideal for factories, laboratories, schools and retail etc.

- The workbenches are available in two sizes 1800 x 650mm and 2000 x 650mm.
- They offer a heavy duty robust construction and yet are economically priced for today's market.
- Each workbench is supplied with a 40mm solid beech worktop.
- Each drawer unit comes complete with central locking.
- Each drawer has a capacity of 50kg.
- Each bench has a capacity of 200kg UDL.
- The benches are powder coated blue and grey.
- Each bench is supplied in knock down form for easy on site assembly and to allow access to the site location.

Hazardous substance cupboards

- It is vital that employers and employees comply with the control of hazardous substances in all working environments.
- This range of cupboards and cabinets enables the separate storage and transportation of hazardous substances as demanded by the CoSHH regulations.
- “No snag” handles with 2-point locking
- Adjustable spill-retaining galvanized shelves for superior spill management*
- Integral liquid-tight sump encourages the correct handling of spills through the use of absorbents*
- Floor chests have a welded integrated sump, angled lid to discourage article placement and a hasp and staple lock - padlock not supplied
- Stands raise cupboards by 500mm with an adjustable foot for uneven surfaces.
